

Oracle Database 19c: Administration Workshop

Titulo: Oracle Database 19c: Administration Workshop

Clave : D107509GC10

Duración: 05 días

Este curso proporciona información detallada sobre la arquitectura de una instancia y base de datos de Oracle Database, lo que le permite administrar los recursos de su base de datos de manera efectiva. Aprenderá a crear estructuras de almacenamiento de bases de datos apropiadas para las aplicaciones comerciales compatibles con su base de datos. Además, aprenderá a crear usuarios y administrar la seguridad de la base de datos para cumplir con los requisitos de su negocio. Este curso proporciona información básica sobre técnicas de respaldo y recuperación. Para proporcionar un tiempo de respuesta aceptable a los usuarios y administrar los recursos de manera efectiva, aprenderá cómo monitorear su base de datos y administrar el rendimiento.

Temario

1 Introduction to Oracle Database

Objectives 1-2

Oracle Database Server Architecture: Overview 1-3

Oracle Multitenant Container Database: Introduction 1-4

Oracle Multitenant Container Database: Architecture 1-5

Oracle Database Instance Configurations 1-6

Database Sharding: Introduction 1-7

Oracle Database Server: Interactive Architecture Diagram 1-8

Summary 1-9

2 Accessing an Oracle Database

Objectives 2-2

Connecting to an Oracle Database Instance 2-3

Oracle Database Tools 2-5

Database Tool Choices 2-6

SQL*Plus 2-7

Oracle SQL Developer 2-9

Oracle SQL Developer: Connections 2-10

Oracle SQL Developer: DBA Actions 2-11

Database Configuration Assistant (DBCA) 2-12

- Oracle Enterprise Manager Database Express 2-13
- Enterprise Manager Cloud Control 13c Features 2-15
- Oracle Enterprise Manager Component Overview 2-17
- Single Pane of Glass for Enterprise Management 2-18
- Oracle Enterprise Manager Database Management 2-19
- Summary 2-21

3 Creating an Oracle Database by Using DBCA

- Objectives 3-2
- Planning the Database 3-3
- Choosing a Database Template 3-4
- Choosing the Appropriate Character Set 3-5
- How Are Character Sets Used? 3-7
- Setting NLS_LANG Correctly on the Client 3-8
- Using the Database Configuration Assistant 3-9
- Using DBCA in Silent Mode 3-10
- Summary 3-11
- Practice Overview 3-12

4 Creating an Oracle Database by Using a SQL Command

- Objectives 4-2
- Creating a Container Database (CDB) 4-3
- Creating a CDB by Using a SQL Command: Example 4-4
- Using the SEED FILE_NAME_CONVERT Clause 4-5
- Using the ENABLE PLUGGABLE DATABASE Clause 4-6
- Summary 4-7
- Practice Overview 4-8

5 Starting Up and Shutting Down a Database Instance

- Objectives 5-2
- Starting the Oracle Database Instance 5-3
- Shutting Down an Oracle Database Instance 5-4
- Comparing SHUTDOWN Modes 5-6
- Opening and Closing PDBs 5-8
- Configuring PDBs to Automatically Open 5-9
- Summary 5-10
- Practice Overview 5-11

6 Managing Database Instances

Objectives 6-2

Working with Initialization Parameters 6-3

Initialization Parameters 6-5

Modifying Initialization Parameters 6-7

Viewing Initialization Parameters 6-9

Working with the Automatic Diagnostic Repository 6-11

Automatic Diagnostic Repository 6-12

Viewing the Alert Log 6-13

Using Trace Files 6-14

Administering the DDL Log File 6-16

Querying Dynamic Performance Views 6-17

Considerations for Dynamic Performance Views 6-18

Data Dictionary: Overview 6-19

Querying the Oracle Data Dictionary 6-20

Summary 6-22

Practice Overview 6-23

7 Oracle Net Services: Overview

Objectives 7-2

Connecting to the Database Instance 7-3

Oracle Net Services: Overview 7-4

Defining Oracle Net Services Components 7-5

Tools for Configuring and Managing Oracle Net Services 7-6

Oracle Net Listener: Overview 7-7

The Default Listener 7-8

Comparing Dedicated and Shared Server Architecture 7-9

Summary 7-10

8 Configuring Naming Methods

Objectives 8-2

Establishing Oracle Network Connections 8-3

Connecting to an Oracle Database Instance 8-4

Name Resolution 8-5

Establishing a Connection 8-6

User Sessions 8-7

Naming Methods 8-8

Easy Connect 8-9

Local Naming 8-10

Directory Naming 8-11

Using Database Services to Manage Workloads 8-12
Creating Database Services 8-13
Summary 8-14
Practice Overview 8-15

9 Configuring and Administering the Listener

Objectives 9-2
Review: Oracle Net Services Overview 9-3
Oracle Net Listener: Overview 9-4
The Default Listener 9-5
Configuring Dynamic Service Registration 9-6
Configuring Static Service Registration 9-8
Summary 9-10
Practice Overview 9-11

10 Configuring a Shared Server Architecture

Objectives 10-2
Shared Server Architecture: Overview 10-3
Comparing Dedicated and Shared Server Architecture: Review 10-4
Enabling Shared Server 10-5
Controlling Shared Server Operations 10-6
SGA and PGA Usage 10-7
Shared Server Configuration Considerations 10-8
Summary 10-9
Practice Overview 10-10

11 Configuring Oracle Connection Manager for Multiplexing and Access Control

Objectives 11-2
Oracle Connection Manager: Overview 11-3
Oracle Connection Manager Processes 11-4
Oracle Connection Manager: Architecture 11-5
Using Filtering Rules 11-6
Implementing Intranet Access Control 11-7
Implementing Internet Access Control 11-8
Using Session Multiplexing 11-9
Configuring Oracle Connection Manager 11-10
Configuring the cman.ora File 11-11
Example of a cman.ora File 11-12
Configuring Clients 11-13

- Configuring the Database Server 11-14
- Configuring the Database Server for Multiplexing (Optional) 11-15
- Using the Oracle Connection Manager Control Utility 11-16
- Review of Oracle Connection Manager Features 11-17
- Summary 11-18

12 Creating PDBs from Seed

- Objectives 12-2
- Provisioning New Pluggable Databases 12-3
- Tools 12-4
- Creating a New PDB from PDB\$SEED 12-5
- Using the FILE_NAME_CONVERT Clause 12-6
- Using OMF or the PDB_FILE_NAME_CONVERT Parameter 12-7
- Summary 12-8
- Practice Overview 12-9

13 Using Other Techniques to Create PDBs

- Objectives 13-2
- Cloning Regular PDBs 13-3
- Migrating Data from a Non-CDB into a CDB 13-4
- Plugging a Non-CDB into CDB Using DBMS_PDB 13-5
- Replicating a Non-CDB into a CDB by Using GoldenGate 13-6
- Cloning a Non-CDB or Remote PDB 13-7
- Using DBCA to Clone a Remote PDB 13-8
- Plugging an Unplugged Regular PDB into CDB 13-9
- Plugging in a PDB Using an Archive File 13-10
- Cloning Remote PDBs in Hot Mode 13-11
- Near-Zero Downtime PDB Relocation 13-12
- Using DBCA to Relocate a Remote PDB 13-14
- Proxy PDB: Query Across CDBs Proxying Root Replica 13-15
- Creating a Proxy PDB 13-16
- Summary 13-17

14 Managing PDBs

- Objectives 14-2
- Changing the PDB Mode 14-3
- Modifying PDB Settings 14-4
- Impact of Changing Initialization Parameters 14-5
- Changing Initialization Parameters: Example 14-6

Using the ALTER SYSTEM Command in a PDB 14-7
Configuring Host Name and Port Number per PDB 14-8
Dropping PDBs 14-9
Summary 14-10
Practice Overview 14-11

15 Database Storage Overview

Objectives 15-2
Database Storage Architecture 15-3
Logical and Physical Database Structures 15-5
Segments, Extents, and Blocks 15-7
Tablespaces and Data Files 15-8
Default Tablespaces in a Multitenant Container Database 15-9
SYSTEM and SYSAUX Tablespaces 15-10
Types of Segments 15-11
How Table Data Is Stored 15-12
Database Block Content 15-13
Understanding Deferred Segment Creation 15-14
Controlling Deferred Segment Creation 15-15
Monitoring Tablespace Space Usage 15-16
Oracle Database Storage Structures: Interactive Architecture Diagram 15-17
Summary 15-18

16 Creating and Managing Tablespaces

Objectives 16-2
Creating Tablespaces 16-3
Creating a Tablespace: Clauses 16-4
Creating Permanent Tablespaces in a CDB 16-7
Defining Default Permanent Tablespaces 16-8
Temporary Tablespaces 16-9
Altering and Dropping Tablespaces 16-10
Viewing Tablespace Information 16-12
Implementing Oracle Managed Files (OMF) 16-13
Enlarging the Database 16-15
Moving or Renaming Online Data Files 16-16
Examples: Moving and Renaming Online Data Files 16-17
Summary 16-18
Practice Overview 16-19

17 Improving Space Usage

- Objectives 17-2
- Space Management Features 17-3
- Block Space Management 17-4
- Row Chaining and Migration 17-5
- Free Space Management Within Segments 17-6
- Allocating Extents 17-7
- Using Unusable Indexes 17-8
- Using Temporary Tables 17-9
- Creating Global Temporary Tables 17-10
- Creating Private Temporary Tables 17-11
- Table Compression: Overview 17-12
- Table Compression: Concepts 17-13
- Compression for Direct-Path Insert Operations 17-14
- Advanced Row Compression for DML Operations 17-15
- Specifying Table Compression 17-16
- Using the Compression Advisor 17-17
- Resolving Space Usage Issues 17-18
- Reclaiming Space by Shrinking Segments 17-19
- Shrinking Segments 17-20
- Results of a Shrink Operation 17-21
- Managing Resumable Space Allocation 17-22
- Using Resumable Space Allocation 17-23
- Resuming Suspended Statements 17-25
- What Operations Are Resumable? 17-27
- Summary 17-28
- Practice Overview 17-29

18 Managing Undo Data

- Objectives 18-2
- Undo Data: Overview 18-3
- Transactions and Undo Data 18-5
- Storing Undo Information 18-6
- Comparing Undo Data and Redo Data 18-7
- Managing Undo 18-8
- Comparing SHARED Undo Mode and LOCAL Undo Mode 18-9
- Configuring Undo Retention 18-10
- Categories of Undo 18-11
- Guaranteeing Undo Retention 18-12
- Changing an Undo Tablespace to a Fixed Size 18-13

- Temporary Undo: Overview 18-14
- Temporary Undo Benefits 18-15
- Enabling Temporary Undo 18-16
- Monitoring Temporary Undo 18-17
- Summary 18-18
- Practice Overview 18-19

19 Creating and Managing User Accounts

- Objectives 19-2
- Database User Accounts 19-3
- Oracle-Supplied Administrator Accounts 19-5
- Creating Oracle Database Users in a Multitenant Environment 19-6
- Creating Common Users in the CDB and PDBs 19-7
- Creating Schema Only Accounts 19-8
- Authenticating Users 19-9
- Using Password Authentication 19-10
- Using Password File Authentication 19-11
- Using OS Authentication 19-12
- OS Authentication for Privileged Users 19-14
- Assigning Quotas 19-15
- Summary 19-17
- Practice Overview 19-18

20 Configuring Privilege and Role Authorization

- Objectives 20-2
- Privileges 20-3
- System Privileges 20-4
- System Privileges for Administrators 20-6
- Object Privileges 20-7
- Granting Privileges in a Multitenant Environment 20-8
- Granting Privileges: Example 20-9
- Using Roles to Manage Privileges 20-10
- Assigning Privileges to Roles and Assigning Roles to Users 20-11
- Oracle-Supplied Roles 20-12
- Granting Roles in a Multitenant Environment 20-13
- Granting Roles: Example 20-14
- Making Roles More Secure 20-15
- Revoking Roles and Privileges 20-16
- Granting and Revoking System Privileges 20-17
- Granting and Revoking Object Privileges 20-18

Summary 20-19
Practice Overview 20-20

21 Configuring User Resource Limits

Objectives 21-2
Profiles and Users 21-3
Creating Profiles in a Multitenant Architecture 21-4
Creating Profiles: Example 21-5
Profile Parameters: Resources 21-6
Profile Parameters: Locking and Passwords 21-8
Oracle-Supplied Password Verification Functions 21-10
Assigning Profiles in a Multitenant Architecture 21-11
Summary 21-12
Practice Overview 21-13

22 Implementing Oracle Database Auditing

Objectives 22-2
Database Security 22-3
Monitoring for Compliance 22-5
Types of Activities to be Audited 22-6
Mandatorily Audited Activities 22-7
Understanding Auditing Implementation 22-8
Administering the Roles Required for Auditing 22-9
Database Auditing: Overview 22-10
Configuring Auditing 22-11
Creating a Unified Audit Policy 22-12
Creating an Audit Policy: System-Wide Audit Options 22-13
Creating an Audit Policy: Object-Specific Actions 22-14
Creating an Audit Policy: Specifying Conditions 22-15
Enabling and Disabling Audit Policies 22-16
Auditing Actions in the CDB and PDBs 22-17
Modifying a Unified Audit Policy 22-19
Auditing Top-Level Statements Only 22-20
Viewing Audit Policy Information 22-21
Value-Based Auditing 22-22
Fine-Grained Auditing 22-24
FGA Policy 22-25
Audited DML Statement: Considerations 22-27
FGA Guidelines 22-28
Archiving and Purging the Audit Trail 22-29

Purging Audit Trail Records 22-30
Summary 22-31
Practice Overview 22-32

23 Introduction to Loading and Transporting Data

Objectives 23-2
Moving Data: General Architecture 23-3
Oracle Data Pump: Overview 23-4
Oracle Data Pump: Benefits 23-5
SQL Loader: Overview 23-7
Summary 23-9

24 Loading Data

Objectives 24-2
SQL Loader: Review 24-3
Creating the SQL*Loader Control File 24-4
SQL*Loader Loading Methods 24-6
Protecting Against Data Loss 24-7
SQL*Loader Express Mode 24-8
Using SQL*Loader to Load a Table in a PDB 24-9
Summary 24-10
Practice Overview 24-11

25 Transporting Data

Objectives 25-2
Data Pump Export and Import Clients 25-3
Data Pump Interfaces and Modes 25-4
Data Pump Import Transformations 25-6
Using Oracle Data Pump with PDBs 25-7
Exporting from a Non-CDB and Importing into a PDB 25-8
Exporting and Importing Between PDBs 25-9
Full Transportable Export/Import 25-10
Full Transportable Export/Import: Example 25-12
Transporting a Database Over the Network: Example 25-13
Using RMAN to Transport Data Across Platforms 25-14
RMAN CONVERT Command 25-15
Transporting Data with Minimum Down Time 25-16
Transporting a Tablespace by Using Image Copies 25-17
Determining the Endian Format of a Platform 25-18

- Transporting Data with Backup Sets 25-19
- Transporting a Tablespace 25-20
- Transporting Inconsistent Tablespaces 25-22
- Database Transport: Data Files 25-23
- Transporting a Database 25-24
- Transporting a Database: Conversion 25-25
- Transporting a Database: Example 1 25-26
- Transporting a Database: Example 2 25-27
- Transporting a Database: Considerations 25-28
- Transporting a Database with Backup Sets 25-29
- Summary 25-31
- Practice Overview 25-32

26 Using External Tables to Load and Transport Data

- Objectives 26-2
- External Tables 26-3
- External Tables: Benefits 26-4
- ORACLE_LOADER Access Driver 26-5
- ORACLE_DATAPUMP Access Driver 26-6
- External Tables 26-7
- Viewing Information About External Tables 26-8
- Summary 26-9
- Practice Overview 26-10

27 Automated Maintenance Tasks: Overview

- Objectives 27-2
- Proactive Database Maintenance Infrastructure 27-3
- Automated Maintenance Tasks: Components 27-4
- Predefined Automated Maintenance Tasks 27-5
- Maintenance Windows 27-6
- Predefined Maintenance Windows 27-7
- Viewing Maintenance Window Details 27-8
- Automated Maintenance Tasks 27-9
- Summary 27-10

28 Automated Maintenance Tasks: Managing Tasks and Windows

- Objectives 28-2
- Configuring Automated Maintenance Tasks 28-3
- Enabling and Disabling Maintenance Tasks 28-4
- Creating and Managing Maintenance Windows 28-5

Resource Allocations for Automated Maintenance Tasks 28-6
Changing Resource Allocations for Maintenance Tasks 28-7
Summary 28-8
Practice Overview 28-9

29 Database Monitoring and Tuning Performance Overview

Objectives 29-2
Performance Management Activities 29-3
Performance Planning Considerations 29-4
Database Maintenance 29-6
Automatic Workload Repository (AWR) 29-7
Automatic Database Diagnostic Monitor (ADDM) 29-8
Configuring Automatic ADDM Analysis at the PDB Level 29-9
Advisory Framework 29-10
Performance Tuning Methodology 29-12
Summary 29-13

30 Monitoring Database Performance

Objectives 30-2
Server-Generated Alerts 30-3
Setting Metric Thresholds 30-4
Reacting to Alerts 30-5
Alert Types and Clearing Alerts 30-6
Database Server Statistics and Metrics 30-7
Performance Monitoring 30-8
Viewing Statistics Information 30-9
Monitoring Wait Events 30-11
Monitoring Sessions 30-12
Monitoring Services 30-13
Summary 30-14

31 Analyzing SQL and Optimizing Access Paths

Objectives 31-2
SQL Tuning Process 31-3
Oracle Optimizer 31-4
Optimizer Statistics 31-5
Optimizer Statistics Collection 31-6
Setting Optimizer Statistics Preferences 31-8
Optimizer Statistics Advisor 31-10
Optimizer Statistics Advisor Report 31-11

Executing Optimizer Statistics Advisor Tasks	31-12
SQL Plan Directives	31-13
Adaptive Execution Plans	31-14
SQL Tuning Advisor: Overview	31-16
SQL Access Advisor: Overview	31-18
SQL Performance Analyzer: Overview	31-19
Managing Automated Tuning Tasks	31-21
Summary	31-22
