

Oracle Database 19c: Data Encryption

Titulo: Oracle Database 19c: Data Encryption

Clave: D1101119GC10

Duración: 01 día 8/hrs

I Introduction

Objectives 1-2

1 Managing Endpoints and Oracle Wallets

Objectives 1-2

What You Already Know About Endpoints 1-3

Endpoints 1-5

Endpoint Administrators 1-6

Managing Oracle Key Vault Endpoints 1-7

Enrolling, Provisioning, and Using an Endpoint 1-8

Types of Enrollment 1-9

Enrolling and Provisioning an Oracle Key Vault Endpoint 1-10

What You Already Know About Oracle Wallets 1-11

What You Already Know About Encryption 1-12

Creating and Opening the Keystore 1-13

Reviewing Transparent Data Encryption 1-14

Creating TDE Encrypted Test Data 1-15

Training Environment and Workflow 1-16

What Is a Virtual Wallet? 1-17

Managing Security Objects 1-18

Uploading and Downloading an Oracle Wallet to and from Oracle Key Vault 1-19

Downloading an Oracle Wallet 1-20

Summary 1-21

Practice 1: Overview 1-22

2 Encryption

Learning Objectives 2-2

Need for Encryption 2-3

Encryption: Overview 2-4

Encryption Is Not Access Control 2-5

Access by Privileged Users 2-6

What problems does encryption solve? 2-8

Cost of Encryption 2-9

What to Encrypt 2-10

Data Encryption: Challenges	2-11
Encrypting Data in Motion	2-12
Native Network Encryption	2-13
Configuring Network Encryption and Data Integrity	2-15
TLS Encryption	2-17
Using SSL	2-18
How SSL Works in an Oracle Environment: The SSL Handshake	2-19
SSL Authentication Process	2-20
Encryption Wallets	2-21
Transparent Data Encryption	2-22
Components of TDE	2-23
Column and Tablespace Level Encryption	2-24
Creating Your Own TDE Master Encryption Key	2-26
Encryption Key Management: Key Generation	2-27
Encryption Key Management: Key Modification and Transmission	2-28
Encryption Key Management: Storage	2-29
Storing the Key in the Database	2-30
Storing the Key in the File System	2-32
Letting the User Manage the Key	2-33
SYSKM Administrative Privilege	2-34
Encrypting the Data Dictionary	2-35
Conversion of Tablespaces: ONLINE Encryption	2-36
Encryption Algorithms	2-37
Automatic Tablespace Encryption	2-38
Oracle Key Vault	2-39
Summary	2-40
Practice 2: Overview	2-41

3 Key Vault and Transparent Data Encryption

Objectives	3-2
Benefits of Using Oracle Key Vault	3-3
Benefits of Using Oracle Transparent Data Encryption	3-4
Reviewing Hardware Security Modules	3-5
Separation of Duties	3-6
Using the Online Master Key with Oracle Key Vault	3-7
Using Security Objects	3-8
Summary	3-9
Practice 3: Overview	3-10

4 Performing Oracle Key Vault Administrative Tasks

Objectives 4-2

Administrative Tools 4-3

Performing Tasks as System Administrator 4-4

Backing Up and Restoring Data for Oracle Key Vault 4-5

Performing Tasks as Key Administrator 4-6

Performing Tasks as Audit Manager 4-7

Oracle Key Vault Management Reports 4-8

Best Practices for Oracle Key Vault 4-9

Summary 4-11

Practice 4: Overview 4-12
